Petition to Director of Art Unit 3643  
Regarding: Examiner's Amendments  
Applicant: Huey Thomas Crochet  
Application #: 10,083,771  
Examiner: Kurt Rowen  
Art Unit: 3643  
Title: Dynamic Snag Resistant Fishing Weight (2-27-02)  
37CFR 1.8

Sir,

In accordance with the notice of allowability mailed to the applicant on 10, 18, 2005 said applicant requests that the director withdraw the allowance for patent given to said applicant. See CFR 1.313 and MPEP 1308.

Under MPEP RULES the applicant has 3 months from the 10, 18, 2005 mailing date of said notice to petition for said withdrawal in a timely fashion.

The reasons for said request are as stated below and would leave the applicant open to contest after patent issues which would make said applicant's fishing weight unmarketable.

1. After examiner's amendments the applicant's specification has no best mode.

The examiner has deleted the applicant's original description of invention section which contained the applicant's best mode for carrying out his invention as well as his preferred embodiment.

Hemisphere heads and a cylindrical body are both supported by the applicant's description of invention that the examiner deleted.
